

Start (with Doug, not Daji)

3:00

- Discussed requirements
 - Explained what old team did
 - Old camera that could be hacked to move
 - Virtual camera
 - Can't get to work
 - Non-persistent
 - Make our own physical device
 - Make our own virtual device
 - Create "package" a high school could use
- Discussed our package vs iserink
 - Iserink is a very heavy program
- What to do with physical device
 - Need multiple (one for each team)
 - Maybe use as anomaly
 - Blue team hacks it
- Physical device
 - Raspberry pi with camera?
 - One for each team
 - Have place for red team to research device's vulnerabilities
 - "Here is X camera purchased at fakeurl.com" (have vulnerabilities there)
 - Can have blue teams partly do the setup
- Package vs just vm
 - Don't bother making deployable network
 - Create vm that can be deployed in a cyber range
