7:00

- Explained that we made contact with CDC, continued contact through discord (or slack chat)
 - Nate Tucker (plus Alex) are points of contact
 - **Need to explain what was done in spring
- This week's assignment for class
 - **Scope of work to include more of a refining aspect
- **For spring CDC
 - Refine the virtual and physical camera (less "hardcore")
 - Make virtual camera more universal
 - Use knowledge from refinement and framework of the previous device to create a 2nd device
 - Virtual vulnerabilities do not have to be limited to a single physical device's
 - Virtual device and physical device may be completely different
- Went over IoT device list
 - Daji approves
 - Thermostats were used to take down the power grid
