

Start  
7:00

- Went over briefing slides
  - What we did
    - Requirements and Constraints assignment
    - Got in contact with CDC personnel
    - Found some devices, starting with a rating
  - What we will do
    - Finish requirements and constraints assignment
    - Weekly report
    - Continue rating
  - \*\*Elaborate more on each item
    - Each has their own slide
- Requirements and Constraints assignment
  - \*\*To functional requirements, add “package”
    - We must decide what is in “package” with CDC
    - Basically must be a “how-to” for setting up the device
      - Must be able to be recreated by a high school teacher
    - Include a section on the physical device in “package”
- \*\*Top priority is making the old virtual device into package form
  - Their files are on their Git page
- Covered matrix of devices and their ratings
  - Explained score categories
  - Weighting the scores
    - Prioritize
      - Cost, cvss score, integration
