

Start

7:00

- Discussed past week
  - Requirements assignment
  - Lightning talk
    - Clarified, it is a task for all teams, the assignment was just poorly communicated
  - Completed weekly report
  - Set up VM
    - Meant to be packaged up and deployable files for CDC
    - Supposed to be easy for anyone to set up
    - Virtual machines contained within a local network
- We will be participating in a CDC the weekend of the 9th
- If selected for an in-class talk
  - Not graded, low stress, still put some effort in though
  - Will be given a week's notice
