Week 4 Brief

9/28/21

Team Activities

- Started on the Requirements and Constraints assignment

- Further researched more devices and vulnerabilities using cve.mitre.org

- Got in contact with CDC staff and invited a couple to our discord channel

- Started organizing and documenting on our git repository

  - Includes table of potential devices and vulnerabilities

- Started scoring matrix for determining the "ideal" IoT device

  - based on the score that the device gets from a set of criteria that we create

This week "To Do"

- Finish Requirements and Constraints assignment by Sunday, Oct. 3
  - Also fill out weekly report and submit by Sunday
- Work on our scoring matrix and criteria for narrowing down IoT device
- Continue research of vulnerabilities and potential IoT devices
