

Team: sdmay22-14

Project Title: Development of IoT Components for CDC

Date: 10/3/21

Members:

Jake Martin

Megan Litterer

Jacob Foster

Justin Tyler

What we've accomplished in the past week:

Jake Martin - added vulnerabilities and devices to our git repo table

Megan Litterer - Documented CVE for potential IoT devices

Jacob Foster - Documented CVE for potential IoT devices and began setting up a working vm(router/firewall) from a .iso file

Justin Tyler - Documented CVE for potential IoT devices

What we're planning to do in the coming week:

Jake Martin - help set up a working vm(router/firewall) from an .iso file

Megan Litterer - Set up website with basic information and work on instructions

Jacob Foster - set up a working vm(router/firewall) from a .iso file

Justin Tyler - also help set up a working vm(router/firewall) from a .iso file

Issues we had in the previous week:

No issues
