Team: sdmay22-14

Project Title: Development of IoT Components for CDC

Date: 10/10/21

Members:

Jake Martin

Megan Litterer

Jacob Foster

Justin Tyler

What we've accomplished in the past week:

Jake Martin - added devices to our git repo table, help set up IoT VM(ssh, telnet)

Megan Litterer - Set up website with basic information

Jacob Foster - Set up a working vm(router/firewall) as well two other machines in a functional network.

Justin Tyler - Tried getting old team's virtual camera to work

What we're planning to do in the coming week:

Jake Martin - secure servers given to us for the CDC this weekend

Megan Litterer - Participate in CDC

Jacob Foster - pariticate in CDC, make friends and memories

Justin Tyler - participate and prepare for CDC

Issues we had in the previous week:

File navigation in docker (trying to follow old team's instructions)
