

Team: sdmay22-14

Project Title: Development of IoT Components for CDC

Date: 10/28/21

Members:

Jake Martin, Megan Litterer, Jacob Foster, Justin Tyler

What we've accomplished in the past week:

Jake Martin - Continued working on configuration script. Started exploitation and firewall script for our virtual IoT devices

Megan Litterer - Started validation on website

Jacob Foster - Worked on a website.

Justin Tyler - Continued working on configuration script. Started exploitation and firewall script for our virtual IoT devices

What we're planning to do in the coming week:

Jake Martin - Continue expanding our configuration and exploitation script to configure and IoT device. Make selection on virtual IoT device.

Megan Litterer - Work with Jacob on a website. Select an IoT device

Jacob Foster - Continue working on website. Select an IoT device

Justin Tyler - Research scripting and work with Jake on creating a script to configure an IoT device. Make selection on virtual IoT device.

Issues we had in the previous week:

No issues this week
